**OFFICE OF PETITIONS**

In re Application of	:	
Sette et al.	:	ON REQUEST FOR
Patent Number: 7,507,803	:	RECONSIDERATION OF
Issue Date: 03/24/2009	:	PATENT TERM ADJUSTMENT
Application No. 10/677754	:	
Filing or 371(c) Date: 10/03/2003	:	
Attorney Docket Number: 2060.0200003/HCC/PAC:	:	

This is in response to the REQUEST FOR RECONSIDERATION OF PATENT TERM ADJUSTMENT DETERMINATION UNDER 37 CFR §1.705(d), filed May 20, 2009. Patentees request that the patent term adjustment be increased from 744 days to 1403 days. Patentees request this correction solely on the basis that the Office will take in excess of three years to issue this patent.

The request for reconsideration patent term adjustment is **DISMISSED**.

On March 24, 2009, the above-identified application matured into U.S. Patent No. 7,507,803 with a patent term adjustment of 744 days. This application for patent term adjustment was timely filed within two months of the issue date of the patent. See 37 CFR 1.705(d).

Patentees request recalculation of the patent term adjustment in view of the decision in Wyeth v. Dudas, 580 F. Supp. 2d 138, 88 U.S.P.Q. 2d 1538 (D.D.C. 2008). Accordingly, patentees assert entitlement to an overall patent term adjustment of 1403 days based on 832 days under 37 CFR 1.702(a)(1) *plus* 730 days under 37 CFR 1.702(b) *less* 159 days of applicant delay.

It is noted that patentees do not acknowledge the patent term adjustment under 37 CFR 1.702(a)(4) of 49 days for the failure of the Office to issue a patent not later than four months after the date on which the issue fee was paid under 35 U.S.C. 151 and all outstanding requirements were satisfied

Under 37 CFR 1.703(f), patentees are entitled to a period of patent term adjustment equal to the period of delays based on the grounds set forth in 37 CFR 1.702 reduced by the period of time equal to the period of time during which patentees failed to engage in reasonable efforts to conclude prosecution pursuant to 37 CFR 1.704. In other words, patentees are entitled to the period of Office delay reduced by the period of applicant delay.

The Office asserts that as of the issuance of the patent on March 24, 2009, the application was pending three years and 903 days after its filing date. The Office asserts that certain action was not taken within the specified time frame, and thus, the entry of a period of adjustment of 881 days of Office delay pursuant to 37 CFR 1.702(a) is correct. At issue is whether patentees should accrue 903 days of patent term adjustment for the Office taking in excess of three years to issue the patent, as well as 881 days, for Office failure to take a certain action within a specified time frame (or examination delay).

The Office contends that the period of 881 days of examination delay under 37 CFR 1.702(a) overlaps with the 903 days of delay in issuing the patent. Patentees' calculation of the period of overlap is inconsistent with the Office's interpretation of this provision. 35 U.S.C. 154(b)(2)(A) limits the adjustment of patent term, as follows:

To the extent that the periods of delay attributable to grounds specified in paragraph (1) overlap, the period of any adjustment granted under this subsection shall not exceed the actual number of days the issuance of the patent was delayed.

Likewise, 35 CFR 1.703(f) provides that:

To the extent that periods of delay attributable to the grounds specified in § 1.702 overlap, the period of adjustment granted under this section shall not exceed the actual number of days the issuance of the patent was delayed.

As explained in *Explanation of 37 CFR 1.703(f) and of the United States Patent and Trademark Office Interpretation of 35 U.S.C. 154(b)(2)(A)*, 69 Fed. Reg. 34283 (June 21, 2004), the Office interprets 35 U.S.C. 154(b)(2)(A) as permitting either patent term adjustment under 35 U.S.C. 154(b)(1)(A)(i)-(iv), or patent term adjustment under 35 U.S.C. 154(b)(1)(B), but not as permitting patent term adjustment under both 35 U.S.C. 154(b)(1)(A)(i)-(iv) and 154(b)(1)(B). Accordingly, the Office implements the overlap provision as follows:

If an application is entitled to an adjustment under 35 U.S.C. 154(b)(1)(B), the entire period during which the application was pending (except for periods excluded under 35 U.S.C. 154(b)(1)(B)(i)-(iii)), and not just the period beginning three years after the actual filing date of the application, is the period of delay under 35 U.S.C. 154(b)(1)(B) in determining whether periods of delay overlap under 35 U.S.C. 154(b)(2)(A). Thus, any days of delay for Office issuance of the patent more than 3 years after the filing date of the application, which overlap with the days of patent term adjustment accorded prior to the issuance of the patent will not result in any additional patent term adjustment. See 35 U.S.C. 154(b)(1)(B), 35 U.S.C. 154(b)(2)(A), and 37 CFR § 1.703(f). See *Changes to Implement Patent Term Adjustment Under Twenty Year Term; Final Rule*, 65 Fed. Reg. 56366 (Sept. 18, 2000). See also *Revision of Patent Term Extension and Patent Term Adjustment Provisions; Final Rule*, 69 Fed. Reg. 21704 (April 22, 2004), 1282 Off. Gaz. Pat. Office 100 (May 18, 2004). See also *Explanation of 37 CFR 1.703(f) and of the*

*United States Patent and Trademark Office Interpretation of 35 U.S.C. 154(b)(2)(A)*, 69 Fed. Reg. 34283 (June 21, 2004).

The current wording of § 1.703(f) was revised in response to the misinterpretation of this provision by a number of Patentees. The rule was slightly revised to more closely track the corresponding language of 35 U.S.C. 154(b)(2)(A). The relevant portion differs only to the extent that the statute refers back to provisions of the statute whereas the rule refers back to sections of the rule. This was not a substantive change to the rule nor did it reflect a change of the Office's interpretation of 35 U.S.C. 154(b)(2)(A). As stated in the *Explanation of 37 CFR 1.703(f) and of the United States Patent and Trademark Office Interpretation of 35 U.S.C. 154(b)(2)(A)*, the Office has consistently taken the position that if an application is entitled to an adjustment under the three-year pendency provision of 35 U.S.C. 154(b)(1)(B), the entire period during which the application was pending before the Office (except for periods excluded under 35 U.S.C. 154(b)(1)(B)(i)-(iii)), and not just the period beginning three years after the actual filing date of the application, is the relevant period under 35 U.S.C. 154(b)(1)(B) in determining whether periods of delay "overlap" under 35 U.S.C. 154(b)(2)(A).

This interpretation is consistent with the statute. Taken together the statute and rule provide that to the extent that periods of delay attributable to grounds specified in 35 U.S.C. 154(b)(1) and in corresponding § 1.702 overlap, the period of adjustment granted shall not exceed the actual number of days the issuance of the patent was delayed. The grounds specified in these sections cover the A) guarantee of prompt Patent and Trademark Office responses, B) guarantee of no more than 3-year application pendency, and C) guarantee or adjustments for delays due to interference, secrecy orders and appeals. A section by section analysis of 35 U.S.C. 154(b)(2)(A) specifically provides that:

Section 4402 imposes limitations on restoration of term. In general, pursuant to [35 U.S.C.] 154(b)(2)(A)-(C), total adjustments granted for restorations under [35 U.S.C. 154(b)(1)] are reduced as follows: (1) To the extent that there are multiple grounds for extending the term of a patent that may exist simultaneously (e.g., delay due to a secrecy order under [35 U.S.C.] 181 and administrative delay under [35 U.S.C.] 154(b)(1)(A)), the term should not be extended for each ground of delay but only for the actual number of days that the issuance of a patent was delayed; See 145 Cong. Rec. S14,718<sup>1</sup>

As such, the period for over three-year pendency does not overlap only to the extent that the actual dates in the period beginning three years after the date on which the application was filed overlap with the actual dates in the periods for failure of the Office to take action within specified time frames. In other words, consideration of the overlap does not begin three years after the filing date of the application.

---

<sup>1</sup> The AIPA is title IV of the Intellectual Property and Communications Omnibus Reform Act of 1999 (S. 1948), which was incorporated and enacted as law as part of Pub. L. 106-113. The Conference Report for H.R. 3194, 106<sup>th</sup> Cong. 1<sup>st</sup> Sess. (1999), which resulted in Pub. L. 106-113, does not contain any discussion (other than the incorporated language) of S. 1948. A section-by-section analysis of S. 1948, however, was printed in the Congressional Record at the request of Senator Lott, See 145 Cong. Rec. S14,708-26 (1999)(daily ed. Nov. 17, 1999).

In this instance, the relevant period under 35 U.S.C. 154(b)(1)(B) in determining whether periods of delay “overlap” under 35 U.S.C. 154(b)(2)(A) is the entire period during which the application was pending before the Office, October 3, 2003, to the date the patent issued on March 24, 2009. Prior to the issuance of the patent, 881 days of patent term adjustment were accorded for the Office failing to respond within a specified time frame during the pendency of the application. All of the 881 days of Office examination delay overlap with the 903 days of Office delay in issuing the patent. During that time, the issuance of the patent was delayed by 903 days, not 903 days and 881 days. The Office took 14 months and 832 days to issue a first Office action, and four months and 49 days to issue a patent after the date on which the issue fee was paid under 35 U.S.C. 151 and all outstanding requirements were satisfied. Otherwise, the Office took all actions set forth in 37 CFR 1.702(a) within the prescribed timeframes. Nonetheless, given the initial 881 days of Office examination delay and the time allowed within the time frames for processing and examination, the application issued three years and 903 days after its filing date. However, the Office did not delay 903 days and then an additional 881 days. Accordingly, at issuance, the Office properly entered 22 additional days of patent term adjustment for the Office taking in excess of three years to issue the patent to reflect the actual number of days, 903, that issuance of the patent was delayed.

In view thereof, no adjustment to the patent term will be made.

The Office acknowledges submission of the \$200.00 fee set forth in 37 CFR 1.18(e). No additional fees are required.

Telephone inquiries specific to this matter should be directed to Attorney Derek Woods, at (571) 272-3232.
